

Executive Headteacher: Mrs J McKeown

Word processor policy

Approved by:	Academic Committee	Date: 22 February 2025
Last reviewed on:	22 February 2024	
Next review due by:	22 February 2025	
Prepared by:	Kelly Wilson	
Valid from:	22 February 2025 – 22 February 2026	

Introduction

This policy on the use of word processors in examinations and assessments is reviewed and updated annually, on the publication of updated JCQ regulations and guidance contained in the publications Access Arrangements and Reasonable Adjustments and Instructions for Conducting Examinations. References to 'AA' relate to JCQ Access Arrangements and Reasonable Adjustments and ICE to JCQ. Instructions for Conducting Examinations.

[ICE_24-25_FINAL.pdf \(jcq.org.uk\)](#)

The school will always follow the AA and ICE guidance, or any other relevant guidance from JCQ, and the rest of this policy is intended to be a summary of the key points set out in the JCQ guidance. If there is ever a discrepancy between the summary below and the guidance provided by JCQ, the school will follow JCQ's guidance.

1. Aims and objectives

This policy details how Danebury school manages and administers the use of word processors (including laptops and tablets) in examinations and assessments. This policy is reviewed annually to ensure compliance with current regulations.

2. Using a word processor

Danebury school complies with AA guidance regarding the use of word processors:

- *'Centres can provide a word processor (e.g. computer, laptop or tablet), with the spelling and grammar check/predictive text disabled, to a candidate where it is their normal way of working within the centre, unless an awarding body's specification says otherwise. For example, where the curriculum is delivered electronically and the centre provides word processors to all candidates. This also includes an electronic braille or a tablet'. (AA, 14.20)* For more details concerning the use of the spelling and grammar check facility / predictive text, the school will follow the guidance in JCQ's AA guidance.
- A word processor cannot simply be granted to a candidate because he/she now wants to type rather than write in examinations or can work faster on a keyboard, or because he/she uses a

laptop at home. The use of a word processor must reflect the candidate's normal way of working within the centre.

- The purpose of an access arrangement is to ensure, where possible, that barriers to assessment are removed for a individual candidate preventing him/her from being placed at a substantial disadvantage due to persistent and significant difficulties. The integrity of the assessment is maintained, whilst at the same time providing access to assessments for a candidate. The school will consider allowing a student to use a word processor as part of their normal way of working in a number of situations, including the following:
 - a learning difficulty which has a substantial and long-term adverse effect on their ability to write legibly.
 - a medical condition.
 - a physical disability.
 - a sensory impairment.
 - planning and organisational problems when writing by hand.
 - poor handwriting.

This list is not exhaustive (it is taken from AA, 5.8.4).

- 'Normal way of working' is defined as support given to the candidate in school for one or more of the following (see AA, 4.2.5):
 - in the classroom (where appropriate);
 - working in small groups for reading and/or writing;
 - literacy support lessons; o literacy intervention strategies;
 - in internal school tests/examinations;
 - mock examinations.

At Danebury school, we consider that a "normal way of working" would in usual circumstances be established throughout the two-year period leading up to a public examination. However, this should certainly be for a minimum of one year, unless there are exceptional circumstances. In all cases, a "normal way of working" necessarily entails the candidate having used a word processor for the mock examination of the qualification in question. The only exception to this is where an arrangement may need to be put in place because of a temporary injury or impairment at the time of an exam or assessment.

At Danebury school, through various online screening assessments, we identify pupils who may have cognitive processing difficulties, slower handwriting speed and/or dyslexic traits. A word processor can help pupils with Specific Learning Difficulties, such as dyslexia, to plan, construct and edit their work more effectively. Via teacher feedback, we are able to identify pupils with illegible handwriting and pupils who have difficulty writing at length due to motor skills difficulties. These pupils are

encouraged to type when completing longer written tasks. Touch typing intervention is offered to laptop users to improve their typing speed and accuracy.

- *'The use of word processors in non-examination assessment components will be considered standard practice unless prohibited by the specification'. (AA, 5.8.2)*

- Access arrangements should be processed at the start of the course. Schools, for example, should be able to process applications at the start of or during the first year of a two-year GCSE course having firmly established a picture of need and normal way of working during Years 7 to 9. However, in the event of a temporary injury or impairment, or a diagnosis of a disability or manifestation of an impairment relating to an existing disability arising after the start of the course, access arrangements should be applied for as soon as is practicable. (AA, 4.2.4)

- It is permissible for a candidate using a word processor in an examination to type certain questions, i.e. those requiring extended writing, and handwrite shorter answers. N.B. Examinations which have a significant amount of writing, as well as those that place a greater demand on the need to organise thought and plan extended answers, are those where candidates will frequently need to type. Examinations which require more simplistic answers are often easier to handwrite within the answer booklet. The candidate avoids the difficulty of visually tracking between the question paper and computer screen. (AA, 5.8.3)

- Candidates may not require the same access arrangements in each specification (AA, 4.2.3). As subjects and their methods of assessments may vary, leading to different demands of our candidates, the need for the use of a word processor is considered on a subject-by-subject basis in discussion with the SENDCo and Examinations Officer, with the final decision taken by the SENDCo. Parents or students may appeal to the Headteacher who will then investigate to check that an appropriate process was carried out prior to the decision being taken.

3. Word processors and their programmes.

Danebury school complies with ICE 14.25 word processors instructions by ensuring: A word processor:

- must be used as a type-writer, not as a database, although standard formatting software is acceptable;
- must have been cleared of any previously stored data, as must any portable storage medium used. An unauthorised memory stick must not be used by a candidate. Where required, the centre must provide a memory stick to the candidate, which is cleared of any previously stored data;
- must be in good working order at the time of the examination;

- must be accommodated in such a way that other candidates are not disturbed and cannot read the screen. Where a candidate using a word processor is accommodated in another room, a separate invigilator will be required;
- must either be connected to a printer so that a script can be printed off, or have the facility to print from a portable storage medium. This must be done after the examination is over. The candidate must be present to verify that the work printed is his or her own. Word processed scripts must be attached to any answer booklet which contains some of the answers;
- must be used to produce scripts under secure conditions, otherwise they may be refused;
 - must not be used to perform skills which are being assessed;
- must not be connected to an intranet or any other means of communication;
- must not give the candidate access to other applications such as a calculator (where prohibited in the examination), spreadsheets etc;
 - must not include graphic packages or computer aided design software unless permission has been given to use these;
- must not have any predictive text software or an automatic spelling and grammar check enabled unless the candidate has been permitted a scribe or is using speech recognition technology (a scribe cover sheet must be completed), or the awarding body's specification permits the use of automatic spell checking;
- must not include computer reading (text to speech) software unless the candidate has permission to use a computer reader;
- must not include speech recognition technology unless the candidate has permission to use a scribe or relevant software;
- must not be used on the candidate's behalf by a third party unless the candidate has permission to use a scribe.

4. Laptops

Danebury school further complies with ICE 14.20 – 14.24 instructions by ensuring:

- Tablets are designed to run for a long period of time once fully charged. Their purpose is to be 'freestanding'. The battery capacity of a laptop or a tablet must be checked before the candidate's examination(s). The centre must ensure that the battery is sufficiently charged for the entire duration of the examination.
- The use of a fully charged laptop or tablet will allow a centre to seat a candidate within the main examination hall without the need for separate invigilation and power points.
- Candidates are present at the end of the examination when their script is printed off so they can verify that the work printed is their own and sign it.

5. Accommodating word processors in examinations

Candidates using word processors are internally accommodated in the following manner:

- in a separate examination room. This will usually be based in one of the school's ICT suites.

Invigilation arrangements relating to the use of word processors include the following:

- Word processors/laptops are logged in using specific exam accounts before candidates enter the exam room and are password protected.
- Read/write software in exam mode, with dictionary disabled.
- on completion of the examination an invigilator will remind the student to save all work.
- the invigilator will notify exam officer, and work is printed off and brought to the student to check and sign.

On completion of the exam:

- When all work is printed and verified, it will be enclosed inside the student's examination script for submission to the awarding body with a completed word processor cover sheet.
- The word processor (laptop or computer) will be cleared of all work.
